Reg. No.															

B.Tech./ M.Tech. (Integrated) DEGREE EXAMINATION, NOVEMBER 2025

First & Second Semester

21LEH101T – COMMUNICATIVE ENGLISH

(For the candidates admitted from the academic year 2021 – 2022 to 2024 – 2025)

Note:

(i) **Part - A** should be answered in OMR sheet within first 40 minutes and OMR sheet should be handed over to hall invigilator at the end of 40th minute.

(ii) **Part – B & Part – C** should be answered in answer booklet.

Time: 3 Hours Max. Marks: 75

PART – A (20 × 1 = 20Marks)

Answer **ALL** Questions

		Marks	BL	CO	PO
1.	While analyzing a dense academic passage, a student highlights keywords, tracks transitions (however, therefore, although), and evaluates whether the conclusion logically follows. This approach demonstrates: (A) Scanning (B) Skimming (C) Critical discourse analysis (D) Extensive reading	1	4	1	10
2.	A reader identifies irony in an author's claim that "war is a gentle teacher". Correct interpretation requires: (A) Literal comprehension only (B) Recognition of figurative meaning and context (C) Ignoring the phrase as irrelevant (D) Consulting a dictionary for "gentle"	1	4	1	10
3.	Identify the sentence with correct subject–verb agreement: (A) The bouquet of roses were beautiful. (B) Neither the teacher nor the students was prepared. (C) The quality of the apples are good. (D) A series of lectures are scheduled.	1	3	2	10
4.	Which of the following sentences demonstrates correct use of modifiers? (A) Running quickly, the gate was reached by John. (B) She almost drove her kids to school every day. (C) Covered in cream, the children enjoyed the cake. (D) Having finished the assignment, the TV was turned on.	1	5	2	10
5.	A student writes a research essay using AI-generated text without attribution. This violates academic integrity because: (A) The essay is too advanced (B) It reduces word count (C) It constitutes plagiarism by misrepresenting authorship (D) It uses complex vocabulary	1	4	3	10
6.	During a stressful job interview, the MOST effective response to anxiety is: (A) Rushing through answers to finish early (B) Pausing, breathing steadily, and reframing the question (C) Memorizing scripted responses (D) Avoiding eye contact with the interviewer	1	3	4	10
7.	Emotional Intelligence MOST directly improves employability because it: (A) Increases technical scores in exams (B) Enables conflict resolution and empathetic collaboration (C) Reduces need for communication skills (D) Guarantees immediate promotions	1	4	4	10
8.	When converting a flowchart into a written report, which feature is MOST important? (A) Creative imagination (B) Logical sequencing and clarity (C) Adding idioms and phrases (D) Narrative chronology	1	4	2	10
9.	Which of the following demonstrates correct netiquette in an online discussion forum? (A) Writing in all caps to emphasize points (B) Respectfully acknowledging others' views before replying (C) Using offensive humor to win arguments (D) Posting unverified information				
10.	During a business presentation, a student reads every slide word-for-word without eye contact. What is the MAJOR weakness? (A) Visual design (B) Has lot of information (C) Audience engagement (D) Slide formatting	1	2	5	10

THE HELPERS

11.	A presentation with excellent visuals but delivered in a monotone with no audience interaction mainly fails in: (A) Technical accuracy (B) Visual creativity (C) Formal vocabulary usage (D) Paralinguistic effectiveness	1	2	5	10
12.	Which conditional sentence is correct? (A) If she would have called, I would go. (B) If I had studied harder, I would have passed the exam. (C) If it rains tomorrow, we would have stayed home. (D) If he comes, I would inform you.	1	2	2	10
13.	Asynchronous communication is best suited for: (A) Real-time decision making (B) Tasks requiring flexibility in time (C) Instant collaboration (D) Live team meetings	1	2	3	10
14.	Choose the word that best fits the sentence: The CEO's statement was deliberately _____, leaving investors uncertain about the company's future. (A) explicit (B) Transparent (C) lucid (D) ambiguous	1	2	5	10
15.	Choose the correct tense to complete the sentence: "By next month, the company _____ its new product line." (A) will launch (B) launches (C) will have launched (D) has launched	1	3	4	10
16.	Change to indirect speech: "She said, 'I am preparing the annual report.'" (A) She said that she is preparing the annual report. (B) She said that she was preparing the annual report. (C) She said that she had prepared the annual report. (D) She says she was preparing the annual report.	1	3	5	10
17.	The two broad areas of communication are (A) Oral and written communication (B) Verbal and written communication (C) Verbal and Non-verbal communication (D) Oral and Non-verbal communication	1	2	2	10
18.	Select the most appropriate word: Nowadays, most children have a tendency to belittle the legitimate concerns of the parents. (A) Disparage (B) applaud (C) reduce (D) begrudge	1	2	1	10
19.	An example of asynchronous medium is (A) Newspaper (B) Film (C) Television (D) Radio	1	2	3	10
20.	Which of the following statements BEST reflects the primary advantage of using visual aids in a presentation? (A) They reduce the need for verbal explanation entirely. (B) They guarantee audience agreement with the presenter. (C) They enhance comprehension and retention by appealing to multiple senses. (D) They allow the presenter to speak less and avoid preparation.	1	2	5	10

PART – B (5 × 8 = 40 Marks)

Answer **ALL** Questions

		Marks	BL	CO	PO
21.	**Read the passage carefully and answer the following questions to assess your comprehension skills. This is a compulsory question.**	8	4	1	10

Until recently most astronomers believed that the space between the galaxies in our universe was a near-perfect vacuum. This orthodox view of the universe is now being challenged by astronomers who believe that a heavy "rain" of gas is falling into many galaxies from the supposedly empty space around them. The gas apparently condenses into a collection of small stars, each a little larger than the planet Jupiter. These stars vastly outnumber the other stars in a given galaxy. The amount of "intergalactic rainfall" into some of these galaxies has been enough to double their mass in the time since they formed. Scientists have begun to suspect that this intergalactic gas is probably a mixture of gases left over from the "big bang" when the galaxies were formed and gas was forced out of galaxies by supernova explosions.

It is well known that when gas is cooled at a constant pressure its volume decreases. Thus, the physicist Fabian reasoned that as intergalactic gas cools, the cooler gas shrinks inward toward the center of the galaxy. Meanwhile its place is taken by hotter intergalactic gas from farther out on the edge of the galaxy, which

THE HELPERS

cools as it is compressed and flows into the galaxy. The net result is a continuous flow of gas, starting as hot gases in intergalactic space and ending as a drizzle of cool gas called a "cooling flow," falling into the central galaxy.

A fairly heretical idea in the 1970's, the cooling-flow theory gained support when Fabian observed a cluster of galaxies in the constellation Perseus and found the central galaxy, NGC 1275, to be a strange-looking object with irregular, thin strands of gas radiating from it. According to previous speculation, these strands were gases that had been blown out by an explosion in the galaxy. Fabian, however, disagreed. Because the strands of gas radiating from NGC 1275 are visible in optical photographs, Fabian suggested that such strands consisted not of gas blown out of the galaxy but of cooling flows of gas streaming inward. He noted that the wavelengths of the radiation emitted by a gas would changes as the gas cooled, so that as the gas flowed into the galaxy and became cooler, it would emit not x-rays, but visible light, like that which was captured in the photographs. Fabian's hypothesis was supported by Canizares' determination in 1982 that most of the gas in the Perseus cluster was at a temperature of 80 million degrees Kelvin, whereas the gas immediately surrounding NGC 1275 was at one-tenth this temperature.

1. The primary purpose of the passage is to
   A. illustrate a hypothesis about the origin of galaxies
   B. provide evidence to dispute an accepted theory about the evolution of galaxies
   C. summarize the state of and prospects for research in intergalactic astronomy
   D. report new data on the origins of intergalactic gas
2. The author uses the phrase "orthodox view of the universe" to refer to the belief that
   A. the space between the galaxies is devoid of matter
   B. the space between galaxies is occupied by stars that cannot be detected by optical photographs
   C. galaxies have decreased in mass by half since their formation
   D. galaxies contain stars, each the size of Jupiter, which form clusters
3. It can be inferred from the passage that, if Fabian is correct, gas in the peripheral regions of a galaxy cluster
   A. streams outward into intergalactic space
   B. is hotter than gas in the central regions of the galaxy
   C. is composed primarily of gas left over from the big bang
   D. results in the creation of unusually large stars
4. The author of the passage probably mentions Canizares' determination in order to
   A. clarify an ambiguity in Fabian's research findings
   B. illustrate a generalization about the temperature of gas in a galaxy cluster
   C. introduce a new argument in support of the orthodox view of galaxies
   D. provide support for Fabian's assertions about the Perseus galaxies
5. According to the passage, Fabian believes that gas flowing into a central galaxy has which of the following characteristics?
   A. It is one-tenth hotter than it was in the outer regions of the galaxy cluster.
   B. It emits radiation with wavelengths that change as the gas moves toward the center of the galaxy.
   C. The total amount of radiation emitted diminishes as the gas cools.
   D. It loses 90 percent of its energy as it moves to the center of the galaxy.
6. According to the passage, Fabian's theory makes use of which of the following principles?
   A. Gas emanating from an explosion will be hotter the more distant it is from the origin.
   B. The wavelength of radiation emitted by a gas as it cools remains constant.
   C. If pressure remains constant, the volume of a gas will decrease as it is cooled.
   D. The volume of a gas will increase as the pressure increases.

THE HELPERS

7. From the passage, which of the following is true of Fabian's theory?
   A. It did not receive approval until Canizares' work was published.
   B. It was not widely accepted in the 1970's.
   C. It did not receive support initially because technology was not available to confirm its tenets.
   D. It supports earlier speculation that intergalactic gas was largely the result of explosions outside the galaxy.
8. In the last passage, the word "heretical" is closest in meaning to
   A. Conventional
   B. Unorthodox
   C. Accepted
   D. Traditional

22. a.	Attempt a paragraph on the data given in the table not exceeding 500 words A company's quarterly sales (in ₹ lakhs) over four regions for two consecutive years are presented in the following table. **Region** | **2023-2024** | **2024-2025** North | 120 | 150 South | 100 | 130 East | 80 | 110 West | 90 | 105 Analyse the data and write a detailed interpretation on the sales performance of the company.	8	5	2	10
	(OR)				
b.	Describe the process of making an online purchase from selecting a product to receiving the order. Use a flowchart to explain the steps involved, including product selection, adding to cart, payment, and order confirmation.	8	5	2	10
23. a.	Explain the differences between synchronous and asynchronous communication with examples.	8	4	3	10
	(OR)				
b.	Write a short paragraph on how Artificial Intelligence is used in real life today, giving suitable examples.	8	4	3	10
24. a.	You are the Secretary of your college cultural club. Write a formal letter to the Manager of a reputed company seeking sponsorship for your upcoming annual cultural festival.	8	5	4	10
	(OR)				
b.	Imagine you are being interviewed over the phone for a position in Research and Development Section. Draft a telephonic conversation between you and the interviewer.	8	5	4	10
25. a.	Explain the key presentation techniques that make a presentation effective.	8	4	5	10
	(OR)				
b.	Design an advertisement for a new eco-friendly product, including a slogan and visuals.	8	4	5	10

PART – C (1 × 15 = 15 Marks)

Answer **ANY ONE** Questions

		Marks	BL	CO	PO
26.	Draft a resume for applying for the position of Software Developer at IBM, Bangalore. (Avoid including any personal details)	15	6	4	10
27.	Write a report on your industrial visit to one of the leading companies of your domain. Include details such as the purpose of the visit, the processes observed, technologies used, and any significant learnings gained.	15	6	5	10
